Project Title: Farmer Marketplace -Real Implementation

Overview:

This final project requires students to design, develop, and deploy a fully functional mobile commerce application based on the previously completed Requirements Documentation (Assignment 1).

The system, Farmer Marketplace, must provide a digital platform that connects farmers in Sierra Leone directly with buyers, enabling transparent pricing, improved market access, and secure transactions.

This project builds on the concepts of mobile commerce, digital payments, and scalable backend systems.

Objective

The objective of this project is to assess students' ability to:

- Transform requirements into a working mobile application
- Build a complete frontend and backend system
- Integrate real-world payment solutions
- Apply mobile commerce best practices
- Deploy and demonstrate a production-ready system

Project Details/Guidelines:

Students are required to group themselves into a team of 3-5 students each group.

The group must select one of the group member assignments 1 or proposed new and submit it before working on the project.

Each group must develop a working Farmer Marketplace system with the following components:

1. Mobile Application (Frontend)

Built using the frontend technologies proposed on the requirements documentation on assignment 1.

(React Native (Expo) Recommended)

Clean and user-friendly UI with minimum screens as follows:

- Splash Screen
- Login / Register
- Home (Product listing)
- Product Details
- Cart
- Checkout
- Farmer Dashboard to add/edit and delete product
- Order History

2. Backend System

- Use the frontend technologies proposed on the requirements documentation on assignment.

Supabase or firebase (recommended)

3. Core Features

Farmer Features

- Register and login
- Create and manage profile
- Add/edit/delete products
- Set prices and stock
- View and manage orders

Buyer Features

- Register and login
- Browse products
- Search and filter items
- Add to cart

- Place orders

Admin Features (Optional but bonus)

- Verify farmers
- Manage users
- Monitor transactions

4. Payment Integration

Students MUST integrate at least ONE real or simulated payment system proposed:

Recommended options:

- Mobile Money (Orange Money / Africell Money simulation or with **Monime**)
- Stripe (for card payments)

Minimum requirement:

- Payment flow must be functional (even if sandbox/test mode)

6. Deployment Requirement

- App must run using Expo Go OR APK build or any

Deliverables

Students must submit:

1. Working Application

- Expo project or APK file

2. Source Code via GitHub

- Frontend
- Backend (if applicable)

3. Documentation (Updated)

- Based on Assignment 1 (refined if needed)
- API description
- System architecture

Presentation:

1. Prepare a PowerPoint presentation that clearly outlines each step taken in the project.
2. The presentation must be professional, engaging, and demonstrate a clear understanding of the hosting process.

3. Dress code for the presentation is strictly official (black formal attire). No jeans, t-shirts, or sleeveless attire is allowed. Any student dressed otherwise will be disqualified and lose the entire project marks.
4. All students must be present for the presentation. Any student absent without a valid reason will also be disqualified.
5. Each group member will be asked three questions to assess individual understanding of the project.

Assessment Criteria

This assignment carries **100** marks and contributes **35%** to the total mark of this module. The following table breaks down the specific marking Criteria to be used for this particular assignment.

Criteria	Marks
Functionality (Core Features Working)	20
UI/UX Design	10
Backend & Database Implementation	15
Payment Integration	10
Code Quality & Structure	10
System Demo & Presentation	10
Individual performance	20
Documentation	5
Total Marks	100

SUBMISSION INSTRUCTIONS

- A hard copy document of the assignment.
- Use the following format for the documentation/report:
 - Font Type: Tahoma
 - Font Size: 12
 - Line Spacing: 1.5
 - Alignment: Justify

Note: Please adhere to the university's policies on academic integrity and plagiarism when completing this assignment.
